Many of us want to do our part to leave the world a better place. Fortunately, there are many ways you can ensure you’ll have a meaningful impact on the world and leave a legacy that lasts long after you’re gone, including the work you do or how you raise your family. Of course, you can also leave a financial legacy, using the wealth you’ve accumulated in your lifetime to benefit the world. Below are six different ways you can leave a financial legacy.

1. Give gifts during your lifetime. If you have the financial freedom to do so, making financial gifts while you are still alive is a great way to leave a legacy. Money donated to qualified charitable organizations can be deducted from your taxes, saving you money while also helping support a good cause. If you want to leave a family legacy, consider giving gifts to loved ones while you are living, like helping pay for your grandchild’s college education. Just make sure you’re aware of annual limits on what you can give to individuals without triggering gift taxes ($14,000 per person in 2015).

2. Make a bequest in a will. Many people use their will to make philanthropic bequests, leaving funds to a favorite charity, their alma mater, or their church. For people who have money to give, recognizing an organization in their will is a relatively easy way to leave a legacy. Bequests in a will don’t require any additional planning and are exempt from estate tax, provided the recipient is a qualified charitable organization. However, if you plan to make a substantial bequest to a charity, you may want to inform them of your plans in advance. This is particularly important if you plan to donate real property, like real estate or artwork, as...
Leaving a Legacy

Continued from page 1

not all charities will want or be able to accept such donations, or if you plan to place restrictions on how the gift is used.

3. Create a charitable remainder trust. If you would like to make a substantial gift to a charity but also want to provide for your heirs or continue to receive income during your lifetime, a charitable remainder trust (CRT) may be an option. Here’s how it works: You transfer property to the trust (and get a tax deduction at the time of the transfer), and you or your heirs receive income from the trust for a specified period of time. When that period ends, the remaining assets go to the charity of your choice. A word of caution: CRTs are irrevocable, which means once you’ve made this decision, you can’t reverse it.

4. Set up a donor-advised fund. Know that you want to leave money to a charity, but not ready to hand it over just yet? Consider setting up a donor-advised fund. A donor-advised fund allows you to make contributions to a fund that is earmarked for charity and claim the associated tax deduction in the year you contribute the funds. You continue to make more contributions to the fund, which are invested and grow free of tax. When you are ready, you can choose a charity to receive all or some of the accumulated assets. It’s a great way to earmark funds for charity now while also accumulating a more substantial amount of money to leave as a legacy.

5. Fund a scholarship. Endowing a scholarship is a great way to make a difference in the life of a talented student. Here’s how it typically works: You give a certain amount of money to the school of your choice, which earmarks it to fund scholarships, often for certain types of students (e.g., female math majors, former foster children, or people suffering from a certain disease or disability). Other scholarships are established through community foundations. A seed gift of $25,000 or $50,000 may be enough to get started. Be aware, however, that while you may be able to have a say in selection criteria for the scholarship, there’s a good chance you won’t be able to select the recipient yourself. If you want to do that, you’ll need to distribute the money in another way, perhaps by setting up your own nonprofit organization.

6. Start a foundation. Starting a family foundation is appealing to many, especially those who like the idea of having greater control over how their money is used as well as the prestige that comes with running a foundation. Well-managed private foundations may also endure for many generations after you’re gone. But you’ll need substantial assets to make setting up a foundation worth it. Plus, foundations are complicated and expensive to set up and administer. But, if you are committed to the idea of giving back and especially if you want to keep the entire family involved in giving (a concern for many wealthy families), a private foundation could be the way to go.

Five Steps to Creating an Investment Plan

Like anything in life, having a plan for your investments will help you reach your investment goals. Below are five steps for crafting your investment plan.

1. Determine Your Goal

Every good investment plan begins with a clear goal in mind. Ask yourself: “Why am I investing? What do I hope to do with the money I save and earn?” For example, you might invest to fund a child’s college education, retire comfortably, buy a house, start a new business, leave a charitable bequest to a favorite cause, or pay for a wedding.

Write down your investment goals. Make them as specific as possible. Think about the kind of lifestyle you want in retirement, the cost of your dream vacation home, the cash you’ll need to start your business, or the cost of tuition where your children might go to college. Write down a realistic estimate of how much you think you’ll need. Making these estimates can be challenging, but it’s an essential investment planning step. After all, if you don’t know where you’re going, you’ll never get there.

2. Decide on Your Time Frame

After you outline your goals, you need to establish your time frame for investing. Typically, your goals will fall into one of three categories:

- **Short-term:** Short-term goals are those you expect to achieve in five years or less.
- **Mid-term:** Mid-term goals are those you expect to achieve in five to 10 years.
- **Long-term:** Long-term goals are those you expect to achieve in more than 10 years.

Your investing time frame has a direct relation to the investments you’ll choose. Generally, the shorter your time horizon, the less risk you’ll want to take. If you will need your money in three years to pay for your daughter’s college education, then putting all your money in riskier investments is probably not wise, as the chances of losing money are greater. Instead, less-risky investments, like bonds, will likely make up a larger portion of your portfolio. But if you’re investing for the long haul (say, for a retirement that’s 30 years away), you can invest in higher-risk investments, since you’ll have more time to recover from a loss.

3. Evaluate Your Tolerance for Risk

All investments come with risk — the chance you could lose your money. But riskier investments also come with the possibility of greater return. As an investor, you must decide how much risk you’re willing to accept. Your personal risk tolerance is closely related to your goals and your time frame, as well as your experience with investing and your feelings about the possibility of losing money.

4. Decide How Much You Want to Invest

Once you’ve considered your time horizon, goals, and risk tolerance, you can consider how much money you want to invest. You should keep a portion of your savings in a stable, easily accessible account to use for emergencies and other immediate needs.

Once you have the funds for your initial investment, you need to decide how much you want to invest on an ongoing basis. This number will be determined by your budget, your investment goals, and your time frame. For smaller, short-term goals, determining ongoing investment amounts is fairly easy. If you want to buy a home in five years, you might open an account with $2,000 you’ve already saved, and then invest $400 a month for the next five years.

Deciding how much to invest for longer-term goals can be more challenging. When saving for retirement, you need to consider how much yearly income you’ll need, your anticipated investment returns, when you want to retire, how long you expect to live, the impact of inflation, and the money you’ll receive from other sources like Social Security. It can be a complicated equation, which is why many people turn to a financial advisor for help running the numbers.

5. Choose Your Investments

Given the thousands of possible options, choosing investments can be overwhelming. But completing the first four investment planning steps should help you make those decisions. Again, your goals, risk tolerance, and time frame will point you in the right direction, such as toward target-date funds designed for retirees or college savers, or perhaps a money market fund for short-term goals. But if you’re baffled by all the options, it’s always a good idea to seek a second opinion. Please call your financial advisor if you’d like help with your investment plan.
Handling the Financial Aspects of Death

The emotional trauma of dealing with a loved one’s death can be devastating. If you must also handle the financial aspects, it can seem overwhelming to deal with all the details.

Following is a checklist of items to consider:

- Your most immediate concern will be to notify family and friends of the death and make funeral arrangements. If you aren’t sure of the deceased’s burial wishes, look for a letter of instruction or a will that details preferences. You’ll probably need to contact a funeral home as well as your loved one’s religious organization. An obituary will need to be prepared, a burial site may need to be purchased, and death certificates must be obtained. Be sure to keep track of all payments for funeral and other expenses.

- If a surviving spouse and/or minor children are involved, evaluate their means of support and determine whether care for dependents needs to be obtained. In terms of the loved one’s home, you may need to deal with security at the residence, provide for the care of pets, send mail to another location, and arrange for the care or disposal of perishable property, such as plants and food.

- Locate any safe deposit boxes and follow necessary procedures to have them opened.

- If the deceased was employed, contact his/her employer to start the process of collecting any outstanding pay, life insurance proceeds, or other benefits. If he/she was retired, notify Social Security and any pension plans.

- Locate important documents, including wills, trusts, deeds, investment records, insurance policies, business and partnership arrangements, and other evidence of assets and liabilities.

- Meet with an attorney to discuss the deceased’s estate matters. Depending on the estate’s complexity, you may need to retain an attorney, accountant, and/or financial advisor. While you may be hesitant to spend the deceased’s funds on professional services, these professionals have experience dealing with the financial matters of estates and can help significantly with the process.

Financial Thoughts

An average replacement rate of 73% of annual income is needed in retirement. That figure ranges from 80% for low-income households to 67% for high-income households. The middle-class replacement rate of 71% assumes that there is a 41% contribution from Social Security. (Source: The Federal Reserve’s National Retirement Risk Index, 2014).

It is estimated that workers who start saving in their mid-30s and plan to work until age 70 should save 6% of their income. That would increase to 24% of income if the worker stops working at age 62. A 45-year-old worker would need to save 10% to retire at age 70 and 44% to retire at age 62 (Source: The Center for Retirement Research, 2014).

When asked what was the best thing about where they lived, 33% of respondents said neighbors, 29% said property values, 20% said schools, and 18% said jobs. Approximately 37% of individuals still live in their home town. Even though neighbors was the highest-rated factor, 47% of respondents did not know their neighbors’ names (Source: Money, October 2014).

The nationwide average public school spending per student is $10,608 (Source: Money, October 2014).
